

AB-NK258-2

Pim1-BKCD Antibody

Pan-specific polyclonal antibody for monitoring the expression of human protein-serine/threonine kinase Pim1

KINEXUS

Target Protein

Name Long:	Proto-oncogene serine/threonine-protein kinase Pim-1
Alias:	PIM; ENSG00000137193
UniProt ID:	P11309
Sequence Predicted Mass (KDa):	45.412 (404 AA; P11309); 35.686 (313 AA; P11309-2)
Observed SDS-PAGE Mass (KDa):	37-45

Immunogen

Antibody Immunogen Source:	Human Pim1 sequence peptide Cat. No.: PE-01BEQ99
Antibody Immunogen Sequence:	TKLAPGKEKEPLESQYQVGC
Location in Target:	Corresponds to amino acid residues T114 to G132; Just before kinase catalytic domain
Peptide Type:	For pan-specific recognition of target expression levels.
Target Phosphosite:	Not phosphorylated

Production

Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Ig Isotype Clone Lot:	Immunoglobulin G
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multipurpose peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from each animal was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris.
Antibody Amount:	25 µg
Antibody Concentration:	0.25 mg/ml / 0.5 mg/ml
Lot Number:	160630 / 160808
Storage Buffer:	Phosphate buffered saline (PBS) pH7.4, 0.05% Thimerasol
Storage Conditions and Stability:	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.

Applications

Product Use:	Western blotting Antibody microarrays
Antibody Dilution Recommended:	2 µg/ml for immunoblotting
Antibody Species Reactivity:	Human, mouse, rat and many other mammals
Detection by Immunoblotting in Cell/Tissue Lysates:	Medium immunoreactivity of a target-sized protein by Western blotting in mouse skeletal muscle, thymus and brain.
Overall Antibody Specificity:	High selectivity
Antibody Cross Reactivities:	No significant cross-reactive proteins detected in diverse mouse tissues, except for a ~24 KDa protein in mouse testes. No significant cross-reactivities detected in various human cancer cell lines, including A431, HEK-293, HeLa, HepG2, Jurkat and MCF7 cells, except for a medium ~100 KDa protein in most of these cell lines, and a 24 KDa protein in A431 cells and a 25 kDa protein in Jurkat cells.

This product is for in vitro research use only and is not intended for use in humans or animals.
