Production	
Production Antibody Host Species:	Rabbit
	Rabbit Polyclonal
Antibody Host Species:	Polyclonal Immunoglobulin G
Antibody Host Species: Antibody Type:	Polyclonal
Antibody Host Species: Antibody Type: Antibody Ig Isotype Clone Lot:	Polyclonal Immunoglobulin G The immunizing peptide was produced by solid phase synthesis on a multipep peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from each animal was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH
