AB-PK712 Met -pY1234+pY1235 +pS1236 Antibody

Phosphosite-specific polyclonal antibody for monitoring the phosphorylation of human protein-tyrosine kinase Met

Address: 8755 Ash Street, Suite 1 Vancouver, British Columbia, Canada V6P 6T3

Target Protein	
Name Long:	Hepatocyte growth factor (HGF) receptor-tyrosine kinase
Alias:	C-met; Hepatocyte growth factor receptor; HGF receptor; HGFR; HGF-SF receptor; Kinase Met; Met proto- oncogene tyrosine kinase; Met proto-oncogene; RCCP2; ENSG00000105976
UniProt ID:	P08581
Sequence Predicted Mass (KDa):	157.712 (1408 AA; P08581-2); 155.541 (1390 AA; P08581); 85.745 (764 AA; P08581-3)
Observed SDS-PAGE Mass (KDa):	140-155
Immunogen	
Antibody Immunogen Source:	Human Met sequence peptide Cat. No.: PE-04ADD90
Antibody Immunogen Sequence:	E(pY)(pY)(pS)VHN(bA)C (bA) = beta-alanine
Location in Target:	Corresponds to amino acid residues E1233 to N1239; In protein kinase catalytic domain activation T-loop between subdomains VII and VIII.
Peptide Type:	For phosphosite-specific recognition of target.
Target Phosphosite:	Tyr-1234+Tyr-1235+Ser-1236
Production Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Ig Isotype Clone Lot:	Immunoglobulin G
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multipep peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from each animal was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris. This antibody was also subject to negative purification over phosphotyrosine-agarose.

AB-PK712 Met -pY1234+pY1235 +pS1236 Antibody

Address: 8755 Ash Street, Suite 1 Vancouver, British Columbia, Canada V6P 6T3

Email: info@kinexus.ca Phone: 604-323-2547

Applications	
Product Use:	Western blotting Antibody microarrays
Antibody Dilution Recommended:	2 µg/ml for immunoblotting
Antibody Species Reactivity:	Human, mouse, rat and many other mammals
Overall Antibody Specificity:	Very high selectivity
Antibody Cross Reactivities:	No significant cross-reactive proteins detected in HeLa and HepG2 cells.

This product is for in vitro research use only and is not intended for use in humans or animals.
