Target Protein

Protein Name Long:	Mast/stem cell growth factor receptor protein-tyrosine Kit
Protein Alias:	CD117; C-kit; Kinase Kit; Mast/stem cell growth factor receptor precursor; PBT; SCFR; SL; V-kit Hardy-Zuckerman 4 feline sarcoma viral oncogene; V-kit Hardy-Zuckerman 4 feline sarcoma viral oncogene homologue; ENSG00000157404
UniProt ID:	P10721
Protein Molecular Mass:	109,865 Da (976 AA; P10721); 109,451 Da (972 AA; P10721-2); 46,658 Da (413 AA; P10721-3)

Immunogen

Antibody Immunogen Source:	Synthetic phosphopeptide patterned after human Kit
Antibody Immunogen Sequence:	TNE(pY)MDM(βA)C
Antibody Immunogen Description:	Corresponds to amino acid residues T718 to M724. Y721 phosphorylation stimulates phosphotransferase activity and induces interaction with PIK3R1. Phosphorylation regulates cell adhesion. Y721 is the second most observed <i>in vivo</i> phosphosite in Kit by high throughput mass spectrometry (≥53 reports recorded in PhosphoSitePlus). Kit is known to be phosphorylated at this site <i>in vitro</i> by Kit.
Antibody Target Type:	Phosphosite-specific

Production

Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Isotype:	IgG
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multipеп peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from these animals was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris.
Amount:	25 µg
Antibody Concentration:	0.5 mg/ml
Storage Buffer:	Phosphate buffered saline pH 7.4, 0.05% Thimerasol
Storage Conditions:	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.
Storage Stability:	>2 years

Applications

Product Use:	Western blotting Antibody microarray
Antibody Dilution Recommended:	2 µg/ml for immunoblotting
Antibody Species Reactivity:	Human Chimpanzee Rhesus Macaque Mouse Chicken

This product is for *in vitro* research use only and is not intended for use in humans or animals.
