## CK1 $\delta$ -pT176 Antibody

Phosphosite-specific rabbit polyclonal antibody for CK1 $\delta$  (CSNK1D)

### Target Protein

<b>Protein Name Long:</b>	Casein kinase 1-delta
<b>Protein Alias:</b>	CSNK1D; Casein kinase 1, delta; CK1-delta; CK1d; EC 2.7.11.1; HCKID; KC1D; Kinase CK1-delta
<b>UniProt ID:</b>	P48730
<b>Protein Molecular Mass:</b>	47,330 Da (415 AA)

### Immunogen

<b>Antibody Immunogen Source:</b>	Synthetic phosphopeptide patterned after human CK1d
<b>Antibody Immunogen Sequence:</b>	LTG(pT)ARYAC
<b>Antibody Immunogen Description:</b>	Corresponds to amino acid residues T173 to A180. T176 phosphorylation stimulates phosphotransferase activity. This is one of the minor <i>in vivo</i> phosphorylation sites in CK1d ( $\geq 1$ report from high throughput mass spectrometry studies recorded in PhosphoSitePlus). CK1d is known to be phosphorylated at this site <i>in vitro</i> by PKCa (PRKCA).
<b>Antibody Target Type:</b>	Phosphosite-specific

### Production

<b>Antibody Host Species:</b>	Rabbit
<b>Antibody Type:</b>	Polyclonal
<b>Antibody Isotype:</b>	IgG
<b>Production Method:</b>	The immunizing peptide was produced by solid phase synthesis on a multipепptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from these animals was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris.
<b>Amount:</b>	25 $\mu$ g
<b>Antibody Concentration:</b>	1 mg/ml
<b>Storage Buffer:</b>	Phosphate buffered saline pH 7.4, 0.05% Thimerosal
<b>Storage Conditions:</b>	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.
<b>Storage Stability:</b>	>2 years

## Applications

<b>Product Use:</b>	Western blotting   Antibody microarray
<b>Antibody Dilution Recommended:</b>	2 µg/ml for immunoblotting
<b>Antibody Species Reactivity:</b>	Human   Chimpanzee   Dog   Mouse   Chicken   Frog   Zebra fish   Fruit fly   Honey bee   Thale cress   Budding yeast

This product is for *in vitro* research use only and is not intended for use in humans or animals.
