## EIF2AK3-pS715 Antibody

Phosphosite-specific rabbit polyclonal antibody for EIF2AK3 (PERK; PEK; PKR)

Address: 8755 Ash Street, Suite 1  
Vancouver, British Columbia,  
Canada V6P 6T3

### Target Protein

<b>Protein Name Long:</b>	Eukaryotic translation initiation factor 2-alpha kinase 3
<b>Protein Alias:</b>	E2AK1; EC 2.7.11.1; EIF2AK1; HCR; HRI; Heme-controlled repressor; heme-regulated inhibitor; Hemin-sensitive initiation factor-2 alpha kinase
<b>UniProt ID:</b>	Q9NZJ5
<b>Protein Molecular Mass:</b>	71,106 Da (629 AA)

### Immunogen

<b>Antibody Immunogen Source:</b>	Synthetic phosphopeptide patterned after human EIF2AK3
<b>Antibody Immunogen Sequence:</b>	IIAP(pS)PQR(βA)C
<b>Antibody Immunogen Description:</b>	Corresponds to amino acid residues I711 to R718. S715 phosphorylation appears to induce downstream induction of transcription. It appears to be one of the most commonly observed phosphosite in EIF2AK3 from high throughput mass spectrometry studies (≥21 reports). EIF2AK3 is known to be phosphorylated at this site <i>in vitro</i> by AMPKA1.
<b>Antibody Target Type:</b>	Phosphosite-specific

### Production

<b>Antibody Host Species:</b>	Rabbit
<b>Antibody Type:</b>	Polyclonal
<b>Antibody Isotype:</b>	IgG
<b>Production Method:</b>	The immunizing peptide was produced by solid phase synthesis on a multipеп peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from these animals was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris.
<b>Amount:</b>	25 µg
<b>Antibody Concentration:</b>	1 mg/ml
<b>Storage Buffer:</b>	Phosphate buffered saline pH 7.4, 0.05% Thimerasol
<b>Storage Conditions:</b>	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.
<b>Storage Stability:</b>	>2 years

## Applications

<b>Product Use:</b>	Western blotting   Antibody microarray
<b>Antibody Dilution Recommended:</b>	2 µg/ml for immunoblotting
<b>Antibody Species Reactivity:</b>	Human   Rat   Mouse

This product is for *in vitro* research use only and is not intended for use in humans or animals.
