

AB-PN525

PGK1-pY196 Antibody

Phosphosite-specific polyclonal antibody for monitoring the phosphorylation of human PGK1

KINEXUS

Address: 8755 Ash Street, Suite 1
Vancouver, British Columbia,

Target Protein

Name Long:	Phosphoglycerate kinase 1
Alias:	Cell migration-inducing gene 10 protein; MGC117307; MGC142128; MGC8947; MIG10; PGK1; PGKA; Primer recognition protein 2; PRP 2
UniProt ID:	P00558
Sequence Predicted Mass (KDa):	44.615 (417 AA; P00558-1)
Observed SDS-PAGE Mass (KDa):	44-48

Immunogen

Antibody Immunogen Source:	Human PGK1 sequence peptide Cat. No.: PE-04ADF85
Antibody Immunogen Sequence:	ELN(pY)FAK(bA)C (bA) = beta-alanine
Location in Target:	Corresponds to amino acid residues E193 to K199; In the middle of the PGK domain. This is the major in vivo phosphorylation site in PGK1.
Peptide Type:	For phosphosite-specific recognition of target.
Target Phosphosite:	Tyr-196

Production

Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Ig Isotype Clone Lot:	Immunoglobulin G
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multipep peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from each animal was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris. This antibody was also subject to negative purification over phosphotyrosine-agarose.
Antibody Amount:	25 µg
Antibody Concentration:	1 mg/ml
Lot Number:	150106
Storage Buffer:	Phosphate buffered saline (PBS) pH7.4, 0.05% Thimerasol
Storage Conditions and Stability:	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.

Applications

Product Use:	Western blotting Antibody microarrays
Antibody Dilution Recommended:	2 µg/ml for immunoblotting
Antibody Species Reactivity:	Human, mouse, rat and many other vertebrates; Phosphosite is highly conserved in diverse species
Antibody Positive Controls:	Very strong immunoreactivity with immunogen peptide on dot blots.
Overall Antibody Specificity:	Very high selectivity
Antibody Cross Reactivities:	No significant cross-reactive proteins detected in HEK-293 and T98G cells.

This product is for in vitro research use only and is not intended for use in humans or animals.
