

AB-PN579

CTNNB1-pY654 Antibody

Phosphosite-specific rabbit polyclonal antibody for CTNNB1 (Catenin-b)

Website: www.kinexus.ca
Email: info@kinexus.ca
Phone: 604-323-2547

Address: 8755 Ash Street, Suite 1
Vancouver, British Columbia,
Canada V6P 6T3

Target Protein

Protein Name Long:	Catenin (cadherin-associated protein) beta 1
Protein Alias:	Beta-catenin; Catenin, beta; CATNB; CTNB1; CTNNB
UniProt ID:	P35222
Protein Molecular Mass:	85,497 Da (781 AA)

Immunogen

Antibody Immunogen Source:	Synthetic phosphopeptide patterned after human CTNNB1
Antibody Immunogen Sequence:	GVAT(pY)AAAC
Antibody Immunogen Description:	Corresponds to amino acid residues G650 to A657. Y654 phosphorylation induces activity and binding to Smad2, TBN and TCF4, stabilizes protein, and inhibits binding to CDH1, LEF-1, Met and Axin-1. This is one of the major <i>in vivo</i> phosphorylation sites in CTNNB1 (≥21 reports from high throughput mass spectrometry studies recorded in PhosphoSitePlus). CTNNB1 is known to be phosphorylated at this site <i>in vitro</i> by Abl1, CSK, EGFR, ErbB2, Met, Src, and TrkA (NTRK1).
Antibody Target Type:	Phosphosite-specific

Production

Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Isotype:	IgG
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multi-peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from these animals was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris.
Amount:	25 µg
Antibody Concentration:	1 mg/ml
Storage Buffer:	Phosphate buffered saline pH 7.4, 0.05% Thimerosal
Storage Conditions:	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.
Storage Stability:	>2 years

Applications

Product Use:	Western blotting Antibody microarray
Antibody Dilution Recommended:	2 µg/ml for immunoblotting
Antibody Species Reactivity:	Human Chimpanzee Rat Mouse Platypus Chicken Frog Zebra fish Fruit fly Honey bee Sea urchin

This product is for *in vitro* research use only and is not intended for use in humans or animals.
