

AB-PN649

RBM9-pT7 Antibody

Phosphosite-specific rabbit polyclonal antibody for RBM9 iso6. This phosphothreonine-site antibody also cross-reacts with a phosphoserine substitution in the phosphosite.

Target Protein

Protein Name Long:	RNA-binding protein 9
Protein Alias:	Fox-1 homolog B;Hexaribonucleotide-binding protein 2;RNA-binding motif protein 9;RNA-binding protein 9;Repressor of tamoxifen transcriptional activity
UniProt ID:	O43251
Protein Molecular Mass:	41,374 Da (390 AA)

Immunogen

Antibody Immunogen Source:	Synthetic phosphopeptide patterned after human RBM9
Antibody Immunogen Sequence:	NEPL(pT)PGYHGC
Antibody Immunogen Description:	Corresponds to amino acid residues N3 to G12. The effect of T7 phosphorylation is unclear. This is the major site of <i>in vivo</i> phosphorylation of RBM9 based on ≥67 mass spectrometry reports recorded in PhosphoSitePlus. RBM9iso6 is known to be phosphorylated at this site <i>in vitro</i> by ERK1 (MAPK3).
Antibody Target Type:	Phosphosite-specific

Production

Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Isotype:	IgG
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multi-peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from these animals was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris.
Amount:	25 µg
Antibody Concentration:	1 mg/ml
Storage Buffer:	Phosphate buffered saline pH 7.4, 0.05% Thimerasol
Storage Conditions:	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.
Storage Stability:	>2 years

Applications

Product Use:	Western blotting Antibody microarray
Antibody Dilution Recommended:	2 µg/ml for immunoblotting
Antibody Species Reactivity:	Human Chimpanzee Dog Rat Mouse Chicken

This product is for *in vitro* research use only and is not intended for use in humans or animals.
