## RXR $\alpha$ -pS260 Antibody

Phosphosite-specific rabbit polyclonal antibody for RXR $\alpha$

### Target Protein

<b>Protein Name Long:</b>	Retinoic acid receptor RXR-alpha
<b>Protein Alias:</b>	NR2B1; Retinoid X receptor alpha; Retinoid X receptor, alpha
<b>UniProt ID:</b>	P19793
<b>Protein Molecular Mass:</b>	50,811 Da (462 AA)

### Immunogen

<b>Antibody Immunogen Source:</b>	Synthetic phosphopeptide patterned after human RXR $\alpha$
<b>Antibody Immunogen Sequence:</b>	C( $\beta$ A)NPS(pS)PNDP
<b>Antibody Immunogen Description:</b>	Corresponds to amino acid residues N257 to P264. S260 phosphorylation inhibits transcriptional activity, inhibits interaction with DNA, RARB, RXRA and VDR, and regulates transcription, intracellular location, and protein stability. This is a minor site of <i>in vivo</i> phosphorylation of RXR $\alpha$ based on $\geq 2$ mass spectrometry reports recorded in PhosphoSitePlus. RXR $\alpha$ is known to be phosphorylated at this site <i>in vitro</i> by ERK1 (MAPK3), ERK2 (MAPK1), JNK1 (MAPK8), and JNK2 (MAPK9).
<b>Antibody Target Type:</b>	Phosphosite-specific

### Production

<b>Antibody Host Species:</b>	Rabbit
<b>Antibody Type:</b>	Polyclonal
<b>Antibody Isotype:</b>	IgG
<b>Production Method:</b>	The immunizing peptide was produced by solid phase synthesis on a multipепptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from these animals was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris.
<b>Amount:</b>	25 $\mu$ g
<b>Antibody Concentration:</b>	1 mg/ml
<b>Storage Buffer:</b>	Phosphate buffered saline pH 7.4, 0.05% Thimerasol
<b>Storage Conditions:</b>	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.
<b>Storage Stability:</b>	>2 years

## Applications

<b>Product Use:</b>	Western blotting   Antibody microarray
<b>Antibody Dilution Recommended:</b>	2 µg/ml for immunoblotting
<b>Antibody Species Reactivity:</b>	Human   Chimpanzee   Rhesus macaque   Rat   Mouse   Platypus

This product is for *in vitro* research use only and is not intended for use in humans or animals.
