

AB-PN727

SMARCB1-pT134 Antibody

Phosphosite-specific rabbit polyclonal antibody for SMARCB1. This phosphothreonine-site antibody also cross-reacts with a phosphoserine substitution in the phosphosite.

Target Protein

| | |
|--------------------------------|---|
| Protein Name Long: | SWI/SNF-related matrix-associated actin-dependent regulator of chromatin subfamily B member 1 |
| Protein Alias: | BAF47; INI1; integrase interactor 1; SNF5; SNF5L1 |
| UniProt ID: | Q12824 |
| Protein Molecular Mass: | 44,141 Da (385 AA) |

Immunogen

| | |
|--|---|
| Antibody Immunogen Source: | Synthetic phosphopeptide patterned after human SMARCB1 |
| Antibody Immunogen Sequence: | WVP(pT)LPNSC |
| Antibody Immunogen Description: | Corresponds to amino acid residues W131 to S138. The effect of T134 phosphorylation is unclear. <i>In vivo</i> phosphorylation of SMARCB1 is not commonly detected (≥ 7 reports from high throughput mass spectrometry studies recorded in PhosphoSitePlus). This human phosphosite is highly conserved in vertebrates and found in the frog. |
| Antibody Target Type: | Phosphosite-specific |

Production

| | |
|--------------------------------|---|
| Antibody Host Species: | Rabbit |
| Antibody Type: | Polyclonal |
| Antibody Isotype: | IgG |
| Production Method: | The immunizing peptide was produced by solid phase synthesis on a multipепptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from these animals was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris. |
| Amount: | 25 μ g |
| Antibody Concentration: | 1 mg/ml |
| Storage Buffer: | Phosphate buffered saline pH 7.4, 0.05% Thimerasol |
| Storage Conditions: | For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at $+4^{\circ}\text{C}$ for more than 3 months. Avoid repeated freeze-thaw cycles. |
| Storage Stability: | >2 years |

Applications

| | |
|---------------------------------------|--|
| Product Use: | Western blotting Antibody microarray |
| Antibody Dilution Recommended: | 2 µg/ml for immunoblotting |
| Antibody Species Reactivity: | Human Chimpanzee Rhesus macaque Dog Rat Mouse Platypus Chicken Frog Zebra fish |

This product is for *in vitro* research use only and is not intended for use in humans or animals.
