

AB-PN728

SOCS7-pY561 Antibody

Phosphosite-specific rabbit polyclonal antibody for SOCS7. This phosphotyrosine-site antibody is highly specific for phosphotyrosine.

Target Protein

Protein Name Long:	Suppressor of cytokine signaling 7
Protein Alias:	NAP4; NAP-4; Nck, Ash and phospholipase C binding protein; Nck, Ash and phospholipase C gamma-binding protein; NCKAP4; Nck-associated protein 4; SOCS6
UniProt ID:	O14512
Protein Molecular Mass:	62,969 Da (485 AA)

Immunogen

Antibody Immunogen Source:	Synthetic phosphopeptide patterned after human SOCS7
Antibody Immunogen Sequence:	EEV(pY)LSL(βA)C
Antibody Immunogen Description:	Corresponds to amino acid residues E558 to L564. The effect of Y561 phosphorylation is unclear. This is the major site of <i>in vivo</i> phosphorylation of SOCS7 (≥36 reports from high throughput mass spectrometry studies recorded in PhosphoSitePlus). This human phosphosite is highly conserved in vertebrates and also found in fish.
Antibody Target Type:	Phosphosite-specific

Production

Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Isotype:	IgG
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multipеп peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from these animals was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris.
Amount:	25 µg
Antibody Concentration:	1 mg/ml
Storage Buffer:	Phosphate buffered saline pH 7.4, 0.05% Thimerasol
Storage Conditions:	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.
Storage Stability:	>2 years

Applications

Product Use:	Western blotting Antibody microarray
Antibody Dilution Recommended:	2 µg/ml for immunoblotting
Antibody Species Reactivity:	Human Rhesus Macaque Dog Rat Mouse Zebra fish Tiger blowfish

This product is for *in vitro* research use only and is not intended for use in humans or animals.
