

# AB-PN745

## CTNNB1-pY489 Antibody

Phosphosite-specific rabbit polyclonal antibody for CTNNB1 (Catenin-b). This phosphotyrosine-site antibody also weakly cross-reacts with a phosphothreonine substitution of the phosphosite.

### Target Protein

<b>Protein Name Long:</b>	Catenin (cadherin-associated protein) beta 1
<b>Protein Alias:</b>	Beta-catenin; Catenin, beta; CATNB; CTNB1; CTNNB
<b>UniProt ID:</b>	P35222
<b>Protein Molecular Mass:</b>	85,497 Da (781 AA)

### Immunogen

<b>Antibody Immunogen Source:</b>	Synthetic phosphopeptide patterned after human CTNNB1
<b>Antibody Immunogen Sequence:</b>	VRLH(pY)GLP(βA)C
<b>Antibody Immunogen Description:</b>	Corresponds to amino acid residues V485 to P492. T489 phosphorylation induces transcription. This is the major <i>in vivo</i> phosphorylation site in CTNNB1 (≥90 reports from high throughput mass spectrometry studies recorded in PhosphoSitePlus). This human phosphosite is highly conserved in vertebrates and also found in sea urchin. CTNNB1 is known to be phosphorylated at this site <i>in vitro</i> by Abl1.
<b>Antibody Target Type:</b>	Phosphosite-specific

### Production

<b>Antibody Host Species:</b>	Rabbit
<b>Antibody Type:</b>	Polyclonal
<b>Antibody Isotype:</b>	IgG
<b>Production Method:</b>	The immunizing peptide was produced by solid phase synthesis on a multipep peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from these animals was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris.
<b>Amount:</b>	25 µg
<b>Antibody Concentration:</b>	0.8 mg/ml
<b>Storage Buffer:</b>	Phosphate buffered saline pH 7.4, 0.05% Thimerasol
<b>Storage Conditions:</b>	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.
<b>Storage Stability:</b>	>2 years

## Applications

<b>Product Use:</b>	Western blotting   Antibody microarray
<b>Antibody Dilution Recommended:</b>	2 µg/ml for immunoblotting
<b>Antibody Species Reactivity:</b>	Human   Chimpanzee   Dog   Rat   Mouse   Platypus   Chicken   Frog   Zebra fish   Fruit fly   Honey bee   Sea urchin

This product is for *in vitro* research use only and is not intended for use in humans or animals.
