

AB-PN750

FBPase-pS88 Antibody

Phosphosite-specific rabbit polyclonal antibody for FBPase (FBP1). This phosphoserine-site antibody also cross-reacts with a phosphothreonine substitution in the phosphosite.

Target Protein

Protein Name Long:	Fructose-1,6-bisphosphatase isoform 1
Protein Alias:	D-fructose-1,6-bisphosphate 1-phosphohydrolase; EC 3.1.3.11; F16P; F16P1; FBP; FBP1
UniProt ID:	P09467
Protein Molecular Mass:	36,814 Da (337 AA)

Immunogen

Antibody Immunogen Source:	Synthetic phosphopeptide patterned after human FBPase
Antibody Immunogen Sequence:	MLK(pS)SFATC
Antibody Immunogen Description:	Corresponds to amino acid residues M85 to T92. S88 phosphorylation inhibits enzyme activity. Phosphorylation at this site in fructose-1,6-bisphosphatase isoform 1 has only been reported in a single mass spectrometry study. However, this human phosphosite is highly conserved in vertebrates and found in fish. FBPase is known to be phosphorylated at this site <i>in vitro</i> by ULK1.
Antibody Target Type:	Phosphosite-specific

Production

Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Isotype:	IgG
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multipепptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from these animals was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris.
Amount:	25 µg
Antibody Concentration:	1 mg/ml
Storage Buffer:	Phosphate buffered saline pH 7.4, 0.05% Thimerasol
Storage Conditions:	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.
Storage Stability:	>2 years

Applications

Product Use:	Western blotting Antibody microarray
Antibody Dilution Recommended:	2 µg/ml for immunoblotting
Antibody Species Reactivity:	Human Rat Mouse

This product is for *in vitro* research use only and is not intended for use in humans or animals.
