Immunogen

Antibody Immunogen Source:	Synthetic phosphopeptide patterned after human SYT1
Antibody Immunogen Sequence:	C(βA)SDP(pY)VKIH
Antibody Immunogen Description:	Corresponds to amino acid residues S309 to H316. The effect of SYT1 Y312 phosphorylation is unclear. This is a major <i>in vivo</i> phosphorylation site in SYT1 based on ≥43 mass spectrometry reports recorded in PhosphoSitePlus.
Antibody Target Type:	Phosphosite-specific

Production

Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Isotype:	IgG
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multi-peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from these animals was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris.
